

Fancy sharing a MEC Skip?

Hi _____

You've heard of recycle bins, energy monitors and recycled toilet paper put forward as ways to help save the planet. But have you ever heard of skip sharing?

I (_____) would like to share a skip with you!

No, this isn't a wind up, I really do want to hire a skip with you, share the cost, help the environment and get rid of a load of rubbish! Fancy it?

To share a skip and dump your load, give me a call on _____
or pop round to:

If you needed a skip anyway, great, I'll share the cost with you! If you haven't planned it, you can have that clear out you've been putting off and do a spot of recycling while you're at it!

We can decide whether you want the skip at yours or mine, what size skip we need and when's best to hire it. And if there's anyone else you think might want a slice of the action, let them know and we'll all share-a-skip together!
